TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, C#, Python, Java, SQL

Frameworks & Libraries: React, Angular, .NET, Django

Tools & Infrastructure: Docker, Kubernetes, Git, SVN, GraphQL

Spoken Languages: English (native), Spanish (fluent)

WORK EXPERIENCE

Optimal Blue

Dec 2024 – Current

Software Engineer

Plano, TX

- Develop and maintain core features for a next-generation Pricing & Product Engine, using Angular and .NET, achieving full feature parity with a legacy system and supporting the migration of 500+ mortgage lenders
- Integrated an AI-powered Originator Assistant into pricing workflows, analyzing real-time loan data to deliver actionable recommendations and improve customer interest rates
- Lead triage and resolution of client-reported issues across multiple platform integrations (Encompass, Empower, Byte), improving system reliability and customer satisfaction
- Built a margin optimization tool during a company-wide hackathon leveraging historical mortgage market data to help lenders competitively price rates and improve decision-making

Walmart Global Tech

Aug 2023 – Dec 2024

Software Engineer

Dallas, TX

- Developed business-critical pricing applications using React and Typescript for Sam's Club Pricing Execution, enabling pricing managers to submit, approve and audit 150,000+ daily updates
- Implemented a configurable Rules Engine UI that automated pricing approvals based on disaster zones, pricing thresholds, and store-specific logic, significantly reducing manual review effort and accelerating time-to-approval
- Triage and resolved production incidents across Spring Boot/Java APIs and frontend services, conducting full root-cause analysis to restore functionality and prevent recurrence
- Partnered with product managers and UX designers to translate complex pricing workflows and wireframes into scalable, maintainable UI components aligned with Walmart design standards

Collins Aerospace

Jun 2022 – May 2023

Software Engineer Intern

Cedar Rapids, IA

- Enhanced 3D data visualizations dashboard using Angular and Three.js, highlighting manufacturing inefficiencies that led to a \$40K cost reduction per product lifecycle
- Created Django/Python REST APIs to aggregate manufacturing data, enabling downstream analysis
- Led UX testing initiatives on an Agile team, improving usability, user engagement, and workflow efficiency through iterative feedback and refinements

Selective Insurance

Jun 2021 – May 2022

Software Developer Intern

Glastonbury, CT

- Increased frontend unit test coverage to 95% using Karma and Jest, remediated legacy code smells, and enforced consistent ESLint standards to reduce technical debt and improve application stability
- Designed and pitched a gamified developer experience tool that visualized code quality metrics, incentivizing clean coding practices and reducing linting errors across the engineering organization
- Contributed to Agile team ceremonies while earning SAFe Agile Practitioner certification, strengthening understanding of enterprise-scale software delivery

CERTIFICATIONS

SAFe Agile Practitioner

Aug 2021

Microsoft Certified: Azure Fundamentals

Feb 2026

EDUCATION

University of Connecticut

Aug 2019 – May 2023

Bachelor of Science in Computer Science, Minors: Data Analytics, Spanish (GPA: 3.72/4.00)

Mansfield, CT
